

# FTVersionTrak PE

The *FTVersionTrak* Programmer Edition, "*FTVersionTrak PE*", offers a comprehensive set of version control tools for protecting and troubleshooting 505 and Modicon *PLC Workshop* program files, all within a format that's easy and convenient to use. Attractively priced, *FTVersionTrak PE* is the ideal solution for *WorkShop* users who wish to enhance their use of *WorkShop* and incorporate version control practices into their programming environment. Acting as insurance against lost or overwritten PLC programs, *FTVersionTrak PE* secures and safeguards your *WorkShop* files and stores multiple versions of the same program. Comparing versions of the same file against each other to determine the differences allows you to roll back to a previous version if a change causes unexpected results. In addition, each time a program is edited, comments about what has changed can be stored with that version of the program file for future reference.

*FTVersionTrak PE* offers *WorkShop* users:

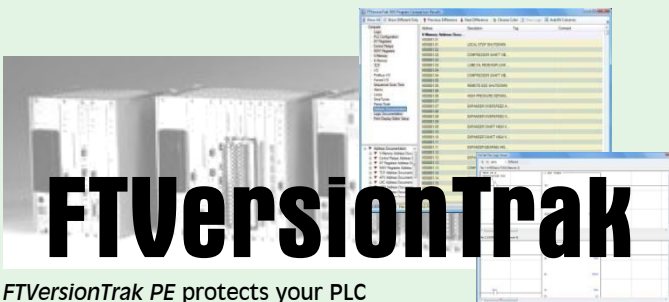

- **Insurance**—*FTVersionTrak PE* delivers peace of mind. Should a problem occur with a PLC program, a backup copy is always readily available for download.
- **Low Price**—*FTVersionTrak PE* has been priced low to make it an affordable add-on tool to *WorkShop*.
- **Ease-of-Use**—*FTVersionTrak PE* may be immediately put to use after it has been installed without requiring set up of any kind.
- **Integration with *WorkShop***—Every action you wish to perform can be accomplished within the *WorkShop* application itself. Working within the familiar *WorkShop* interface is convenient and designed to save you time.

*FTVersionTrak PE* is the ideal solution for *WorkShop* users who wish to incorporate version control practices into their programming environment.

Upgrade at any time to take advantage of additional features and services including the ability to:

- Schedule automated backups of PLC programs
- Create more than one repository
- Set user rights and security
